github.com/nakul1010

Computer Science student passionate about deep learning. Highly-capable leader, having led a Senior class project to completion. Proficient in a range of modern technologies including Python,C++,BigQuery,Cloud Computing .

EDUCATION

Bachelor of Engineering
PVG's COET,Pune
06/2018 – 06/2022   *CGPA : 9.12*

Higher Secondary Education
MIT College
06/2016 – 06/2018   *Percentage : 81*

PERSONAL PROJECTS

Crop Price Prediction (01/2020 – 03/2020) ⍈
- Smart India Hackathon Project for static and dynamic prediction of cotton prices in India.

Mental health (04/2020 – Present) ⍈
- Mental health diagnosis with adaptive quizzing, sentiment analysis, inkblot tests and many more cool features.

Middle Man Elimination (01/2020 – Present) ⍈
- Designing a E commerce Website with the help of block chain and Ml for stabilization of Supply chain.

News Recommendation System (09/2019 – 01/2020) ⍈
- Design and deployed a content+collaborative based recommendation system on google cloud platform ,automated the training phase with apache airflow.

SKILLS

Machine Learning

DeepLearning(Pytorch and Tensorflow)

Predictive & Prescriptive Analysis

Data Visualization   Marketing

Feature Engineering   Recommendation System

CERTIFICATES

Coursera : End-to-End Machine Learning with TensorFlow on GCP

Coursera : Production Machine Learning Systems

Coursera : CNN(convolution neural network)
